

2027 Montana Folk Fest Electrical Connectors

At the 2027 Montana Folk Festival, we exclusively use the HUBBELL Locking Plug: Non-NEMA, Black/White, 125/250V AC, 50 Amp, 3 Pole, 4 Blade - for our 50 amp cables, electrical boxes, and 50 amp wall plugs. If you don't have this connector we do recommend getting an adapter, and to let us know if you'll need something else so that we can work out a solution and can be prepared. Our 50 amp adapters will be first come first serve, and will require a \$100 deposit.

For 20 amp power we use a 20 amp, 125 VAC, GFCI plug, we do recommend that you have surge protectors, on your end, just as a cautionary protection, and that you have properly rated cables and connectors to minimize any electrical issues. We will provide cables and power up to your cart/vendor area.
